Jill,

I apologize for all the misunderstanding that took place (b) (6)
I am just figuring out the extent of it. The information you requested through me from others should be on its way. Travis is sending his via CD and it is in the mail today. If you do not receive all the information that you have requested within a week or if you need any additional information or if anymore obstacles arise, please let me know. I am and have been the point of contact for all permitting at the Complex. If Jamey or you have any more information needs or questions in regards to determining if NEPA is required or not please let me know. If you can't reach me at my office (509) 548-2928, call my cell (b)(6), or email always works.

Malenna

Thanks, Greg. I will use what you've sent so far and if I need more information, I'll be back in touch. I will also connect again with Mary on the flow data she has and with Travis on the water quality sampling data he's been collecting – so that they can send it to me. I will hopefully not take up too much of anyone's time in obtaining the necessary data to analyze and use during permit development.

Thanks to Malenna for serving as my point of contact as we move permit development forward! Malenna, just so you know, Steve had talked to me a few weeks ago regarding the NEPA questions from our NEPA coordinator (Jamey), and I think we left it that Steve and Jamey would be in contact directly. I'm not sure if that's happened yet, but I'll check with Jamey. If they haven't had a chance to connect on this, do you want to talk with Jamey (or me)? I think once I have access to the monitoring data, and have answers to the NEPA questions, that I'll be set for a while. Thanks again.

Subject: final decision

Jill,

The final decision on how to deal with data sharing came down the chain this afternoon. Both Mary and I are permitted to work with you and share data so you can complete your tasks but we need to cc Malenna on everything. Sorry for the confusion but let me know if I can help you with anything else temperature related.
